

East Liberty Town Square

at a glance

- Two rain gardens totalling 2,420 SF
- 500 SF Salvaged cobblestone pavers
- 52 new trees
- 167 new shrubs
- 10,777 new perennials, grasses, sedges, bulbs and native plants

East Liberty Town Square in front of East Liberty Presbyterian Church is a project lead by East Liberty Development, Inc. and designed by CH2MHill and Viridian Landscape Studio. This pilot demonstration project was built to show that green infrastructure solutions are a viable alternative to expensive traditional infrastructure in solving the region's combined sewer problem. Green infrastructure solutions like rain gardens and bioswales used here, can also serve as a public amenity, in this case a town square style public park.
