

## WATERFALL HOUSE

These clients worked with Jeff Genter, RLA and Brody Little, MLA to design a covered porch and waterfall to replace the existing deck and complement the existing patio. We removed existing deck and constructed brick piers to support a new trex deck and porch roof to match house. Brody designed the porch to compliment the house. It includes a skylight, ceiling fan and finished pine ceiling a staircase, with lights in the risers, leads to the patio below. Perennials were added around the patio and multiple plantings were placed to blend the waterfall into the landscape. The naturalistic waterfall takes advantage of the slope to the fire pit, and a foot path from the side deck allows access over the stream.
